

# FIRST IN SHOW<sup>SM</sup>

PRESENTED BY **Qualcomm**

## CREATE THE FUTURE

### JOIN OUR **ARTS-INSPIRED** ROBOTICS **SEASON**

**Lights, camera, STEAM!** Together with art, science, technology, engineering, and math inspire big ideas, bold action – and creativity. These skills make it possible to design and build what dreams are made of – to create art and experiences that bring us together, entertain us, and move us. During our 2023-2024 season, **FIRST IN SHOW<sup>SM</sup>** presented by Qualcomm, we're shining a spotlight on the role that STEM plays in the arts and empowering young people to bring their ideas to life.

**The future is yours to create. Join us!**
